### Customer's feedback

"We have been working with AARS Freelancing Services for over 6 months and are thrilled with the results! Their Project Manager Raji Malla is smart, responsive and easy to work with. She's on top of current web technologies, and regularly offers up recommendations and explanations that help us make a better product. I have worked with a number of programmers and developers over the years, and appreciate most how Raji communicates in a straight-forward manner so not only do I understand what she's talking about, but I can convey the same information to my clients. Her extensive knowledge of the Bonita soft BPM system has helped our organisation customise and deploy Bonita soft BPM to run our custom workflows, generate reports, implement two-step authentication using third-party security applications such as Google Authenticator as well as integrating with other external systems."

### Customer's feedback

"Beginning of digital transformation in Zion was only a dream a few months ago, until we found AARS Freelancing Services Coding Team. They were and still are fundamental to our digital evolution. Always focused, fast, developing together, presenting improvements, adapting and helping us to reach next level, leaving excel and google sheet in the past. They propose and develop solutions that exceed our expectations. They really go the extra mile to guarantee a valuable solution to the business."
